--- Note: General Guidelines:---

Authors are informed to kindly read the following general guidelines carefully for preparing the final version of the paper:

- Ensure the ethical guidelines in the final camera-ready paper submission. This includes providing proper acknowledgments, obtaining necessary permissions for any copyrighted material,
- Run a Spellcheck and proofread your paper thoroughly to ensure that it contains no typos and grammatical errors
- Include good quality figures/graphics,
- Tables must be drawn in a table format, not as an image.
- Text description and callouts for all the figure numbers, table numbers, and equation numbers must be present in the paper as per the order of their occurrence.
- Reference not to be cited in the Abstract and Conclusion part.
- Ensures a minimum of 5 pages and 10 quality references
- * Incorporate the suggestions recommended by the reviewers.

* Guidelines for Artificial Intelligence (AI)-Generated Text : The use of content generated by artificial intelligence (AI) in an article (including but not limited to text, figures, images, and code) shall be disclosed in the acknowledgments section of any article submitted to an IEEE publication. The AI system used shall be identified, and specific sections of the article that use AI-generated content shall be identified and accompanied by a brief explanation regarding the level at which the AI system was used to generate the content.

The use of AI systems for editing and grammar enhancement is common practice and, as such, is generally outside the intent of the above policy. In this case, disclosure as noted above is not required, but recommended.

Information or content contained in or about a manuscript under review shall not be processed through a public platform (directly or indirectly) for AI generation of text for a review. Doing so is considered a breach of confidentiality because AI systems generally learn from any input.

KINDLY NOTE: Camera-ready paper & eCopyright submission deadline: On or before 02 December 2025 (Hard Deadline).

Best regards

Publication Committee,
